

Living Room In-Ceiling Surround Sound

This premium living room system delivers big picture and big sound to bring movies, TV shows and games to life. A large LCD display on an adjustable articulating mount provides the optimum viewing angle, while in-ceiling speakers and a powerful subwoofer deliver impressive sound from your favorite sources.

Bigger Is Better

With a large LCD display, high definition movies, TV shows and games have never looked better.

Hear the Difference

Aimable in-ceiling speakers improve performance by directing sound at the listener. Paired with a powerful subwoofer, the system delivers unsurpassed detail and impact.

Simple Control

Walk into the room and press a single button on the touchscreen remote to start the show.

Cut the Clutter

In-ceiling speakers blend into the décor without compromising performance, while a wireless kit allows placement of the subwoofer almost anywhere in the room.
